Glass Open Book

Tempsens Polska Sp.z o.o.

Follow the company

Description:

Tempsens specialize in design and manufacture of high precision temperature sensor for Glass Industries. For more than 40 years we served major project re-builds with their total Temperature Sensor Solutions which includes Spout bowl to Stack Thermocouples. Our customers are having long experience of service life with our Thermocouples.

Tempsens is one of the largest solution providers for Thermal and Cable Products. We have tied up with world leaders in Thermal engineering technology for critical components, Non - contact Temperature measurement. We offer furnace cameras, thermal imaging cameras, pyrometers and more.

Temperature plays a vital role in glass-forming process as the viscosity of glass completely depends on the thermal uniformity and any change in this particular factor will results in problems in the next stages of the glass forming process. So keeping in mind this important factor the accurate reading of the temperature of different part of the glass is vital.

Our website www.tempsens.com

Location: Poland

Sectors: Glass container, Flat / Float glass, Glassware

Activities: Equipment / Machinery supplier
