APEGG - Glass Experts

MOVE FORWARD WITH US

Follow the company

Description:

APEGG Ltd is an independent service company, that is providing assistance for glass container - manufacturers, fillers and brand owners. We support the new generation of glass makers and fillers around the world.

Along with the trouble-shooting services, we are engaged in research and near-scientific activities in the field of glass making.

At APEGG we rely on the new generation of glass makers and together look to the future. That is why we are investing in software development for the glass container industry. Our software solutions such as; Defect Elimination System (DES), Gob Forming Simulator, Forming Process Animation help glass manufacturers to support their daily tasks.

Brand owners and fillers are supported by APEGG for any topic relating to glass container quality, design and line performance. Our knowledge about design and the manufacturing process allow a quick assessment of new container shapes and enables us to provide new design concepts.

Thanks to our understanding of the glass manufacturing process from raw material to the filled container, and our experience with different cultures around the world APEGG can assist any plant no matter the situation.

Onsite and remote assistance are offered. APEGG guide companies to success by mastering all modern-day challenges - ultimately guiding the glass container manufacturers to make the required changes to be successful.

We create the GLASS MANUFACTURING CULTURE 2.0, transforming the glass container industry working and education principles.
