Glass Open Book

Peak Sensors

Temperature Sensor Experts

Description:	Peak Sensors manufacture many thermocouples for the Glass Industry. We supply directly to glass plants, glass furnace contractors and glass furnace manufacturers. Our sensors are used throughout the glass manufacturing process, including melting, refining or working end processes. As temperature control experts, we know how important it is to measure the temperature of glass accurately during the manufacturing process. A satisfactory standard of product can only be achieved with adequate temperature control.
Location:	United Kingdom
Sectors:	Glass container, Flat / Float glass
Activities:	Equipment / Machinery supplier
