Glass Open Book

Arton LTD

Follow the company

Description:

Our production concept in Arton is a combination of the most advanced engineering methods with the traditional craftsmanship of people of Bulgaria in order to achieve highest quality level on glass moulds and spare parts. Since the foundation of our first workshop in 2005 we have adopted a development strategy on basis of improving our quality and obtaining new capabilities. We follow closely the technological developments both on machining and glass manufacturing sectors in order to decide for our investment projects.

The small workshop on the beginning which was equipped with just 2 conventional machines has became a full equipped factory containing 12 CNC Machines, 13 conventional machines, welding and polishing shops and a specialized quality control department in the past 12 years. Our development projects are also supported by European Regional Development Fund of EU.

Arton has internalized Total Quality Management and Just in Time Production approaches in order to provide its customers with high quality products continuously and timely. Arton is ISO 9001-2008 certificated since 2012. The specific customer-focused marketing & sales approach of Arton enables us to build long-term collaborations and close relations as a solution partner with our customers.
