Glass Open Book

Bock Energietechnik GmbH

Description:

Bock Energietechnik GmbH is a „Down-to-Earth" family-owned company with 15 employees that supply customers with the best solutions in order to use electrical power effectively.

Especially in the field of design and manufacture of electrical boosting systems for the glass industry, we have nearly 40 years of experience and are active worldwide.

With the individual custom made solutions designed by us we can allow more power and efficiency of glass melting tanks. Also in the sector of basalt melting, we work successfully.

We support our customers in the conceptual stage with our experience and our know-how and search together for the best solution.

We realize the implementation of the planned solutions and support our customers in installation, during operation and continuously during maintenance.

Our professional staff is dedicated and trained for installation, maintenance and service and ensure a fast and reliable work.

Numerous customers at home and abroad use our equipment and take advantage of our service - and they are loyal to us even decades. For us this is the best confirmation that our customers are satisfied.
