Glass Open Book

Stewart Engineers, Inc

Stewart continues to empower the most successful independent float glass producers

Follow the company

Description:	Stewart Engineers is a privately held and family-owned organization consisting of glass industry experts. “Stewart Engineers” is our historical name and registered trademark. With headquarters in North Carolina and operations around the globe, Stewart Engineers designs cutting-edge glass making and coating technology and arranges for local licensed civil engineering firms to actualize these designs in the countries where we do business. We are the only provider of turnkey float factories with CVD systems. Stewart Engineers is built on a foundation of technology. Our expertise in float bath technology and online pyrolytic CVD systems, combined with relentless commitment to continuous improvement, enables Stewart to deliver superior products and services. With over 30 years of generating proven solutions for the float glass manufacturing industry, StewartFloat® and AcuraCoat® technologies are the premier choice for the independent glass manufacturer. Stewart Engineers serves a diverse client base including an array of countries, cultures, and markets. As such, we endeavor to provide technology and services tailored to customer’s needs to ensure lasting financial prosperity in the float industry.
