GlassPro

TME brings innovation in glass process and IS variable

Follow the company

Description:	TME Engineering has designed and supplied equipment for the hollow glass industry since 1979. Our specific area of expertise is working with glass bottles producers. We initially specialised in the development of variable equipment for the IS Machines. At TME we want to be close to our customers, to understand their issues and to innovate in order to propose equipment which will help them in their industrial performance. GlassPro has brought expertise in fire polishing to TME. TME and GlassPro equipment is fabricated in Belgium and French workshops. We work with our customers in different regions of the globe: Europe, Asia, Africa, Middle East, North America, Central America, South America
Location:	Belgium
Sectors:	Glass container, Glassware, Glass processing
Activities:	Equipment / Machinery supplier, Service provider
