Glass Open Book

VITO Irmen GmbH & Co. KG

Visions in tapes With our individual solutions, we help our customers to optimise their processes and improve their products.

Follow the company

Description:

Whether for the production, storage or transport of products made of glass, plastic and metal, distance – and shipping pads and spacer pads from VITO offer your products the necessary security. At the same time they protect fragile surfaces and, as a result, contribute considerably to a reduction of costs and avoidance of damage caused by transport or storage.

VITO shipping pads work simultaneously as shock-absorbers and slip-resistant spacers. They help to reduce costs and to avoid damage caused during transport.

The characteristics of the materials cork, self-adherent foam and cell rubber allow numerous possible applications. They are extremely suitable for the stacking and transport of insulating glass or ready-glazed window and door elements made of plastic and metal.

With our individual solutions, we help our customers to optimise their processes and improve their products. Benefit from the reliable quality of our self-adhesive products and system solutions. Our experience and our know-how are reflected in each individual product. VITO is there to support you in organizing your production processes more efficiently and in increasing the quality of your achievements.
