TUROMAS S.L

Our passion, your progress

Description:

With more than 30 years in the glass industry and collaborations with the main processors and glass manufacturers, TUROMAS has become a global reference in intelligent machinery to store, load and cut glass in markets as demanding as automotive, architecture or decoration.

100% of the design, manufacture, programming and assembly of the TUROMAS machinery is carried out in its facilities in Spain using exclusively European components of the highest quality to guarantee the reliability, safety, performance and precision expected from a leading brand.

The development force is the core of your business. TUROMAS offers a complete range of standardized machinery, although many of the equipments are designed to measure of the exigencies of its clients. It's not just about selling a machine to load, cut or store glass, it's about accompanying the user through the entire process to find the one-stop solution they really need. Something that TUROMAS has had in mind since its beginnings in 1985.

The brand has an extensive sales network that currently covers more than 100 countries and a 24/7 remote technical support service to ensure optimal attention at the right time.

Apart from its headquarters in Spain, TUROMAS has a branch in Santiago de Chile and another in Sao Paulo. Latin America is one of the most strategic markets for expansion, which is why from November 2019 it has a third branch in Bogota.

In July 2019, the Centre for Innovation and Special Developments TUROMAS (CIDET), the cornerstone of the Group's expansion project, was inaugurated. The Center channels efforts in research, design and development of new machines, software and 4.0 solutions.

This expansion project will increase production capacity through the construction of five buildings of 2,000 square meters each, in Rubielos de Mora (Teruel).
