Glass Open Book

Graphoidal Developments LTD

Follow the company

Description:	Founded in the late 1950's, Graphoidal Developments is a specialist manufacturer of lubrication and engineering systems, uniquely qualified to provide the necessary expertise, products and support services for the international glass container and tableware industries. Based in Chesterfield, Graphoidal Developments has a powerful reputation and one objective: to provide highly efficient lubrication solutions designed to make its customers manufacturing process more efficient, productive and profitable. On paper its simple but in practice it's the driving force behind our wide range of high performance standard and custom built equipment. A Groupe Rondot Company, our success has been achieved by providing high levels of customer service. We have the experience, specialist skills and in house system design capability to generate bespoke, original designs at competitive prices. We also understand the importance of reliable operation. We know that many of our systems are used in 24-7 production line processes where failure is not an option. As a result we build equipment up to a quality, not down to a price.
