Glass Open Book

GLASS MODEL

Follow the company

Description:	Glass Model has been specialising in the manufacture of hollow glass prototypes since 2003. We make mock up in plexiglass and 3D print since 2006 too. As the current market leaders in prototypes for the beer, wine and spirits industry. We work with glassmakers and designers throughout the world, we know that the high quality of our pieces will meet your expectations. The quality of our prototypes will not only enable you to persuade your clients but also to confirm a shape, a weight of glass and even the appearance of an engraving and thus avoid a glass test. Our models can enable consumer testing, tests of your bottling lines, point of sale advertising and many other time-saving applications. Our bespoke pieces can be filled and used functionally in the same way as a container coming off a production line. I hope that this information will make you want to know more about our business. Please feel free to contact us.
Location:	France
Sectors:	Glass container
Activities:	Service provider
