Glass Open Book

Klar Glass Sp. z o.o.

Independent flint glass packaging producer

Description:

In food and spirits industry the packaging is an important part of the marketing strategy. Once it is well designed and professionally manufactured, the packaging is the thing that makes a difference on the market.

Our products undergo strict, multistage quality control process. Thanks to that we can guarantee high quality of the finished goods. The glass plant in Pobiedziska has successfully met requirements of HACCAP and ISO 9001:2008 standards. This is a certificate of our utmost care and dedication to the quality.

We are determined in placing continuous growth high on our priority list in order to be able to meet the requirements of the most demanding customers, whom we can offer tailor-made, high quality products. Our modern production lines in the Pobiedziska glass plant put out more than 100 mio. pieces of glass packaging a year. We are focused on the improvement of the design and production processes as well as on the training of the production and quality specialists.

We are a reliable long-term partner. Our customers have high appreciation of our professionalism, individual approach, assistance in new implementations, production flexibility and competitive trade terms.
