Glass Open Book

Cortex Glass

The Next Step in Hot End Inspection!

Description:

About Us

Cortex Glass develops and sells innovative Hot End Inspection, Process Monitoring and Control systems for the perfume, cosmetics, container and table ware glass industry.

All software, electronics and mechanics are designed in-house by our skilled team of engineers. This makes us flexible, fast and capable to customize our systems to specific situations and to specific glass production processes.

Our service engineers have years of experience in the glass industry and make every installation a success.

Mission

Our mission is to provide the best, most innovative and easy to use Hot End systems on the market. With our systems our customers should be able to:

- Improve Product Quality
- Improve Productivity
- Reduce Production Costs
- Reduce Customer Claims
- Reduce Material
- Reduce Energy Consumption
- Reduce Pollutant Emissions

Vision

At Cortex Glass, we strive to improve the competitiveness of the glass industry through innovation. In our vision, the glass industry must continuously improve the glass production process with innovative inspection, monitoring and control systems.

Location: Netherlands

Sectors: Glass container, Glassware, Special glass

Activities: Equipment / Machinery supplier
