Glass Open Book

Stevanato Group

Description:

Founded in 1949, Stevanato Group is committed to create systems, processes and services that guarantee the integrity of parenteral medicines.

It is comprised of two operational divisions:

• Pharmaceutical Systems (Ompi and Balda brands): specialized in ready-to-use glass containers and bulk primary packaging (syringes, cartridges, vials, and ampoules); high quality and high precision plastic solutions for diagnostic, pharmaceutical and medical device applications.

• Engineering Systems (Spami, Optrel, InnoScan and SVM brands): specialized in glass forming technology, inspection systems, assembly, packaging machines and serialization solutions for the pharmaceutical industry.

These two divisions enjoy a close, synchronous relationship, featuring daily exchanges which ensure that Stevanato Group has complete control over the entire production process, from purchasing the finest raw materials to offering exceptional after-sales customer service.

The Group also benefits from the SG Lab activity that provides technical and analytical services on the potential interaction between the pharmaceutical product and the container.
