Glass Open Book

FlammaTec, spol. s r.o.

Advanced combustion technology for glass

Description:

FlammaTec, spol. s r.o. & FlammaTec Germany GmbH offer burners suitable for all type of regenerative furnaces, end port and side port. All burners produce highly luminous flame with underport and sideport installation and they are suitable for oil, gas and dual fuel creating low NOx through excellent heat transfer resulting in faster batch melting.

Over 4,000 burners have been installed on float, container, tableware and special glass furnaces. When replacing conventional burners, FlammaTec's advanced LoNOx burners improve heat transfer and efficiency, and lower emissions:

- Underport Gas Injector, Flex or Freejet
- Underport Gas/Oil Dual Injector, Flex or Freejet
- Underport Heavy Oil Injector
- Sideport Gas Injector, Flex
- Oxy/Gas Burner
- Flat Free Jet Injector
- New Hydrogen Carbon Free Burner
