Glass Open Book

B-Tec Intralogistik GmbH

Description:	As a medium-sized company, in the legal form of a limited liability company, Christian Backhaus founded B-Tec Intralogistik GmbH in 2020. From the beginning, the focus of the company was to create holistic solutions in the field of conveyor technology and process technology for container glass production. Decades of experience and in-depth know-how are the foundation of the company and an integral part in all areas. In order not only to work from the modular system, the company has the ability to create special solutions for its customers. No matter what task we are faced with, our technicians and designers will find a solution for everything. Highly qualified employees always guarantee you excellent quality and first-class service. From acquisition to after sales everything "from a single source" and "Made in Germany".
