Glass Open Book

Tek Metal Profil

Producing under one roof aluminium spacer bars, polysulphide sealant, butyl sealant and molecular sieves used in insulating glass manufacturing.

Follow the company

Description:	Tek Metal Profil was founded in 1985, since then the company keeps its leading position. Considering a customer satisfaction as a principle and an uncompromising sense of quality have been our guarantee of existence through the past quarter century. Producing under one roof aluminum spacer bars, polysulphide sealant, butyl sealant, molecular sieve and corner keys used in insulating glass production, Tek Metal as the leader of the domestic market has the highest capacity in Turkey. Our goal is to be world leader in our sector. Our company always follows up innovations of the industry and renovates its technology. Tek Metal Profil, with its vastly spread reliable name inside and outside the domestic market will keep adding new services for its customers. With concept of customer satisfaction, corporate happiness and the awareness of environment safekeeping we will decisively continue to be a role model company.
