Glass Open Book

ERNST PENNEKAMP GmbH & Co. OHG

It is easier to become the leading manufacturer, than to remain the No. 1 for a long time.

Follow the company

Description:	Since 77 years, Pennekamp has manufactured and supplied more than 2,500 different types of lehrs, various handling equipment and many outstanding cold-end coating technologies to all divisions of glass industry such as Container, Tableware, Pharmaceutical, Pattern & Wired Glass, Solar & Float, Automotive & Speciality Glass sectors across the world. By using Pennekamp energy efficient Annealing lehrs in the above mentioned fields, our clients have been always benefited from an excellent treatment as well as their final products quality. Our Decorating ovens also guarantee the best quality of different printing materials after they have been cured on the glass articles in our Lehrs. Pennekamp energy saving preheated mould ovens and firing kilns provide reliability for the continuous supply to your glass production. Our machinery and automation provide the clients by highest productivity at their Cold end area where the articles are supposed to be coated and smoothly handled to the next section of factory. Ware transfer, one up to four axis Stackers, Cross Conveyor, Dosing units are only some examples of our other reliable equipment which work maintenance-free in continuous production lines to increase performances. Pennekamp patented BLEU Burner can reduce energy consumption and bring optimum combustion at every operating stage, hence it improves heat distribution.
