

Glass Open Book

ERNST PENNEKAMP GmbH & Co. OHG

It is easier to become the leading manufacturer, than to remain the No. 1 for a long time.

Description: Pennekamp has supplied annealing lehrs and related equipment to all fields of the glass industry worldwide for 75 years. By using energy efficient Pennekamp annealing lehrs, glass sectors such as Container, Tableware, Pattern Glass, Wired Glass, Solar, Float, Automotive Glass and Speciality Glass all receive excellent treatment and quality. Your products receive an optimal cold coating using the Pennekamp glass coating systems. Our decorating furnaces guarantee the best decorating quality for your products. The energy saving Pennekamp preheated mould oven and firing ovens provide reliability for the continuous supply to your glass production. Pennekamp machinery for further automatization provides automated efficient production at the cold end. Ware transfer, Stacker, Cross conveyor, Cleaning brushes, Dosing Unit are only some examples of efficient and durable Pennekamp equipment which works very reliably in continuous operation to increase the performance of your production. BLEU Burner Low Emission Unit: Reduced energy consumption, optimum combustion at every operating stage, improved heat distribution. This type of gas burner can be installed at a later date and integrated into an electrically heated lehr without any mechanical conversion measures.

Location: Germany

Sectors: Glass container, Flat glass, Glassware, Special glass

Activities: Equipment / Machinery supplier
