Glass Open Book

DECO GLAS GmbH

ADDING VALUE THROUGH GLASS DECORATION! The DECO GLAS team puts its heart and soul into presenting your product in an eye-catching way on the shop shelf.

Description:

For more than 50 years now, we have accompanied international global players and start-ups on their way to giving their glass packaging a unique appearance - from the idea to the graphic design of the brand to filling support. As an owner-managed company in the heart of Europe, we support you with a team of fresh minds in the implementation of your brand identity.

We are at the cutting edge of technology in the world of glass finishing: we make eyes shine, glass appear frosty, graphic elements become tangible reliefs and give your brand a very high-class appearance in the processes by means of precious metals and metallic effects:

- COATING
- PRINTING
- LABELLING
- SLEEVING.

From Montabaur to the whole world - with an export share of over 40 %.

Glass finishing generates added value. It offers the consumer a strong orientation in his purchase decision.
