Glass Open Book

Description:

INCOA Performance Minerals

Purity and Performance are in our name!

,

INCOA supplies high-quality fine, calcium carbonate for North American markets. The exceptional purity of the high-brightness limestone we use provides a unique starting material for our InCal products. In addition, our patent-pending process does not include the use of processing chemicals that can interfere with application performance. The resulting products are characterized by:

by

Chemical Free - none used in mining or processing.

Low levels of acid insoluble minerals High purity - No Iron, No Lead Lowest moisture in the market Steep particle size distributions

Low levels of oversize particles and agglomerates

Low levels of ultrafine particles

Available in grades from sizing for all applications from Clear Glass production (course) to ultrafine and treated

ground for Plastics, Coatings and Adhesives.

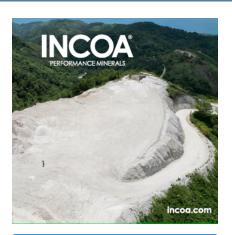

Location: United States

Sectors: Glass container, Glassware, Special glass, Glass fiber

Activities: Raw materials supplier
