INCOA Performance Minerals

Purity and Performance are in our name!

Description: INCOA supplies high-quality fine, calcium carbonate for North American markets. The exceptional purity of the high-brightness limestone we use provides a unique starting material for our InCal products. In addition, our patent-pending process does not include the use of processing chemicals that can interfere with application performance. The resulting products are characterized by:

- Chemical Free - none used in mining or processing.
- Low levels of acid insoluble minerals
- High purity - No Iron, No Lead
- Lowest moisture in the market
- Steep particle size distributions
- Low levels of oversize particles and agglomerates
- Low levels of ultrafine particles

Available in grades from sizing for all applications from Clear Glass production (course) to ultrafine and treated ground for Plastics, Coatings and Adhesives.
