Upson Maybach

Hose & Belting Since 1931

Follow the company

Description:	Upson Maybach is a fabricator of high temperature conveyor belts made from materials such as Kevlar, Nomex, PBO, Fiberglass, Cotton, and Polyester. We have full woven conveyor belt fabrication capabilities such as stitching/sewing, lacing, resin treatment, etc. Belts can be supplied sewn endless, with treated ends and stainless steel Clipper lacing, with sewn cleats, with sewn tracking guides, custom cut to width and overcast, and more! Upson Maybach's high temperature conveyor belts could be constructed in a solid woven construction or needled fibers. Our product range includes conveyor belts, roller covers, pads, curtains, etc. We would love the opportunity to work with you on your high temperature conveyor belt application!
