Glass Open Book

PSI Ltd

Integrated solutions for the glass industry

Description:

1. Integrated design of glass container production lines:
• Design of glass furnaces and feeders
• Production lines' configuration development (glass-forming machines, annealing furnaces, conveyors, inspection and packaging equipment)
• Engineering communication schemes
2. Refractory materials for glass furnaces and feeders, furnace automation
3. Supply, installation, supervision and commissioning of IS-machines with a Russian interface
4. Inspection equipment, including installation supervision and staff training
5. Full range of cold section equipment:
• Conveyor Lines
• Palletizers
• Slinging machines
• Shrink packaging machines
• Shuttles and pallet transfer systems
6. Related technological equipment:
• Ware transfers and stackers
• Equipment for Quality control department (pressure testers, compression testers, etc.)
• Automatic washing lines for pallet gaskets
• Control system for glass-forming machines
7. Mold kits for glass container manufacture of any complexity
8. Spare parts for all types of equipment

Follow the company

Location: Russian Federation

Sectors: Glass container

Activities: Equipment / Machinery supplier
