

Glass Open Book

PSI Ltd

Integrated solutions for the glass industry

Description:	<ol style="list-style-type: none">1. Integrated design of glass container production lines:<ul style="list-style-type: none">• Design of glass furnaces and feeders• Production lines' configuration development (glass-forming machines, annealing furnaces, conveyors, inspection and packaging equipment)• Engineering communication schemes2. Refractory materials for glass furnaces and feeders, furnace automation3. Supply, installation, supervision and commissioning of IS-machines with a Russian interface4. Inspection equipment, including installation supervision and staff training5. Full range of cold section equipment:<ul style="list-style-type: none">• Conveyor Lines• Palletizers• Slinging machines• Shrink packaging machines• Shuttles and pallet transfer systems6. Related technological equipment:<ul style="list-style-type: none">• Ware transfers and stackers• Equipment for Quality control department (pressure testers, compression testers, etc.)• Automatic washing lines for pallet gaskets• Control system for glass-forming machines7. Mold kits for glass container manufacture of any complexity8. Spare parts for all types of equipment
Location:	Russian Federation
Sectors:	Glass container
Activities:	Equipment / Machinery supplier
