Glass Open Book

I.S. Maintenance & J.C. Manager

Field of activity:	Engineering
Glass industry sector:	Glass container
Type of employment:	Full-time

IS Maintenance & Job Change Manager with 19+ years of experience in the container glass manufacturing industry, specializing in IS and AIS machine maintenance, reliability, job change management, and continuous process improvement.

Extensive hands on experience in C Class repairs, complete overhauling, preventive maintenance, and troubleshooting of IS and AIS machines. Strong technical expertise with Emhart, BDF, and Bottero forming equipment, focused on maximizing machine availability, reducing downtime, improving production efficiency, and enhancing product quality.

Currently leading maintenance operations by managing preventive and corrective maintenance activities, job change planning and execution, breakdown analysis, spare parts management, and cross functional coordination with Production, Forming, Engineering, Quality, and Procurement teams to ensure smooth plant operations.

Core expertise includes:

• IS & AIS Machine Maintenance and Complete Overhauling

• C Class Repairs and Machine Rebuilding

• Job Change Planning and T1 & T2 Time Reduction

• Preventive, Predictive and Planned Maintenance (PMS)

• Breakdown Analysis, Root Cause Analysis and Corrective Actions

• Total Productive Maintenance (TPM) and Lean Manufacturing

• Process Improvement and Equipment Reliability

• Spare Parts Planning and Inventory Management

• Team Leadership, Coaching and Technical Development

• Manufacturing Operations and Continuous Improvement

Passionate about driving operational excellence through innovative maintenance strategies, process optimization, and data driven decision making. Committed to improving equipment reliability, increasing production efficiency, reducing maintenance costs, and developing high performing maintenance teams while maintaining the highest standards of safety, quality, and operational performance.
