I.S. Maintenance & J.C. Manager

Field of activity: Engineering
 Glass industry sector: Glass container
 Type of employment: Full-time

IS Maintenance & Job Change Manager with over 18 years of experience in the container glass industry. Experienced in C-Class repairs and complete overhauling of IS and AIS machines. Hands on experience with Emhart, BDF, and Bottero machines.

Skilled in maintenance and repair, manufacturing operations, Total Productive Maintenance, and Lean Manufacturing practices. Focused on improving machine performance, reducing online breakdowns, and increasing efficiency of IS and AIS machines.

Key responsibilities include:

Planning and executing preventive maintenance schedules for IS and AIS machine mechanisms and variables

Analyzing breakdowns and implementing corrective actions to minimize recurrence

Reducing T1 time during job change and supporting the Forming Department to reduce T2 time

Organizing job change preparation meetings and ensuring all equipment and variables are ready as per job card

Checking machine equipment condition before installation to ensure proper functioning

Coordinating with the IS Forming Department to resolve machine related issues

Indenting and managing spare parts for IS & AIS machines

Preparing job cards and arranging required gauges as per specifications

Conducting breakdown analysis and providing feedback to the Production Department

Strong operations professional with a focus on process improvement, new idea development, and continuous performance enhancement of IS and AIS machines.
