Glass Open Book

Glass Container, Mould Design & Mould Shop Expert

Field of activity:	Engineering
Glass industry sector:	Glass container
Type of employment:	Full-time, Part-time, Remotely

Self-motivated, peak-performing professional with 25+ years of progressive supervisory experience in the Glass Container Industry and strong technical manager with extensive manufacturing, development and implementation experience, including the following:

- Strong working knowledge of glass container design, new concept and mould design.
- Hands-on, application and results-oriented field experience, including glass container manufacturing and mould repair shop background.
- Broad experience in technical assistance and training of internationals and US companies.
- Effective communication skills; conversant in Spanish and English.

I will work with your design team to provide customers with recommendations to ensure that the technical quality of the container, as well as the aesthetic requirement is of high standard.

Additionally, we can audit and provide support to your mould repair shop on the best practices for mould equipment maintenance, repair, inspection and more.

Languages:	English, Spanish
Living location:	United States (Open for relocation)
Preferred job location:	United States
Willingness to travel:	Any-time
